SEPTEMBER 2020 TREND SURVEY

Employees who put their family or personal needs ahead of their jobs are not looked on favorably.

Employees have to choose between advancing in their jobs or devoting attention to their family or personal lives.

There is an unwritten rule that you cannot take care of family needs on company time.

Childless employees are asked to shoulder a heavier workload than employees with children.

Childless employees are expected to work longer hours than employees with children at home.

Employees with children are evaluated differently than childless employees.
